Monthly List
of
Russian Accessions

Vol. 5, No. 4 July 1952

THE LIBRARY OF CONGRESS
WASHINGTON : 1952

INTRODUCTORY NOTE

The MONTHLY LIST OF RUSSIAN ACCESSIONS is a record of the publications in the Russian language issued in and outside the Soviet Union that are currently received by the Library of Congress and a group of cooperating libraries. Whenever possible, Soviet publications printed in other languages spoken in the Soviet Union are also included. It consists of four parts.

Part A lists monographic literature, but no accessions published earlier than 1945 are included. To facilitate the use of this LIST by readers who are not thoroughly familiar with the Russian language, the title in the original language in Part A is preceded by its English translation in brackets. Since this procedure changes the alphabetic arrangement of title entries, cross references are given from these titles to their English translations.

Part B lists the contents of Russian periodicals, but no accessions printed earlier than 1947 are included. The format of this part remains unchanged.

Part C is a subject guide to the periodical articles listed in Part B. The titles of the articles are cited in English translation and are listed under the appropriate subject headings. The following abbreviations are used for the months of the year:

Ja	January	My	May	S	September
F	February	Je	June	O	October
Mr	March	Jl	July	N	November
Ap	April	Ag	August	D	December

Sample title: Electric action of the brain in glaucoma. L.S.Levina, G.M.Neishtadt. Vest.oft. 30 no.5:8-12 S-O '51.

Explanation: An article with title given above in English translation, written by L. S. Levina and G. M. Neishtadt, will be found in the September-October 1951 issue of *Vestnik oftalmologii*, vol. 30 no. 5, pages 8-12.

The periodicals included in each issue and the abbreviations used for individual periodicals are listed at the beginning of Part C in each issue of the LIST. The number in parentheses following each periodical title indicates the class number in which it is to be found in Part B.

Part D is a list of monographs known to have been published recently in the USSR but not located in the Slavic Union Catalog. Translations in English of the titles are included, but since the principal purpose of this part is to serve as a want list, the translation follows rather than precedes the original title.

Except in Part C, the material is divided into 17 subject classes and is arranged alphabetically within each class. All entries are transliterated according to the usual Library of Congress system except that ligatures are omitted. Unless otherwise indicated, all listed items are represented in the collections of the Library of Congress. Symbols* representing other libraries indicate when items are available in those libraries. Curves ( ) around a symbol indicate that the material is available in another library but not in the Library of Congress. Lists of periodicals received regularly by the cooperating libraries will be published from time to time.

Orders for microfilm or photostat copies of the listed items that are in the collections of the Library of Congress may be placed with the Photoduplication Service, Library of Congress, Washington 25, D. C. From time to time an appendix listing whole runs of Russian periodicals available on microfilm or microcards from various establishments will be included in the LIST.

The MONTHLY LIST OF RUSSIAN ACCESSIONS is for sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C.

Price of single copies varies; subscription price, $4.25 a year domestic, $5.50 a year foreign.

Monthly List
of
Russian Accessions

Vol. 5, No. 5

August 1952

THE LIBRARY OF CONGRESS
WASHINGTON : 1952

INTRODUCTORY NOTE

The MONTHLY LIST OF RUSSIAN ACCESSIONS is a record of the publications in the Russian language issued in and outside the Soviet Union that are currently received by the Library of Congress and a group of cooperating libraries. Whenever possible, Soviet publications printed in other languages spoken in the Soviet Union are also included. It consists of four parts.

Part A lists monographic literature, but no accessions published earlier than 1945 are included. To facilitate the use of this LIST by readers who are not thoroughly familiar with the Russian language, the title in the original language in Part A is preceded by its English translation in brackets. Since this procedure changes the alphabetic arrangement of title entries, cross references are given from these titles to their English translations.

Part B lists the contents of Russian periodicals, but no accessions printed earlier than 1947 are included. The format of this part remains unchanged.

Part C is a subject guide to the periodical articles listed in Part B. The titles of the articles are cited in English translation and are listed under the appropriate subject headings. The following abbreviations are used for the months of the year:

Ja	January	My	May	S	September
F	February	Je	June	O	October
Mr	March	Jl	July	N	November
Ap	April	Ag	August	D	December

Sample title: Electric action of the brain in glaucoma. L.S.Levina, G.M.Neishtadt. Vest.oft. 30 no.5:8-12 S O '51.

Explanation: An article with title given above in English translation, written by L. S. Levina and G. M. Neishtadt, will be found in the September–October 1951 issue of *Vestnik oftalmologii*, vol. 30 no. 5, pages 8–12.

The periodicals included in each issue and the abbreviations used for individual periodicals are listed at the beginning of Part C in each issue of the LIST. The number in parentheses following each periodical title indicates the class number in which it is to be found in Part B.

Part D is a list of monographs known to have been published recently in the USSR but not located in the Slavic Union Catalog. Translations in English of the titles are included, but since the principal purpose of this part is to serve as a want list, the translation follows rather than precedes the original title.

Except in Part C, the material is divided into 17 subject classes and is arranged alphabetically within each class. All entries are transliterated according to the usual Library of Congress system except that ligatures are omitted. Unless otherwise indicated, all listed items are represented in the collections of the Library of Congress. Symbols* representing other libraries indicate when items are available in those libraries. Curves ( ) around a symbol indicate that the material is available in another library but not in the Library of Congress. Lists of periodicals received regularly by the cooperating libraries will be published from time to time.

Orders for microfilm or photostat copies of the listed items that are in the collections of the Library of Congress may be placed with the Photoduplication Service, Library of Congress, Washington 25, D. C. From time to time an appendix listing whole runs of Russian periodicals available on microfilm or microcards from various establishments will be included in the LIST.

The MONTHLY LIST OF RUSSIAN ACCESSIONS is for sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C.

Price of single copies varies; subscription price, $4.25 a year domestic, $5.50 a year foreign.
